Ask us about
CoolSculpting –

The world's number
1 non-surgical fat
reduction procedure
for women

Many of us have
pockets of fat that
just won't go away.

If these stubborn
bulges are keeping
you from looking and
feeling your best,
CoolSculpting can
help you get back the
body you deserve
using proven science
instead of surgery.

CoolSculpting is a
revolutionary
contouring treatment
that freezes stubborn
fat, which is then
naturally eliminated
from your body. No
needles, no special
diets, no supplements,
no surgery. And most
importantly, no
downtimes. It's safe,
medically-cleared, and
very effective.

Ask us about CoolSculpting –

The world's number 1 non-surgical fat reduction procedure for women

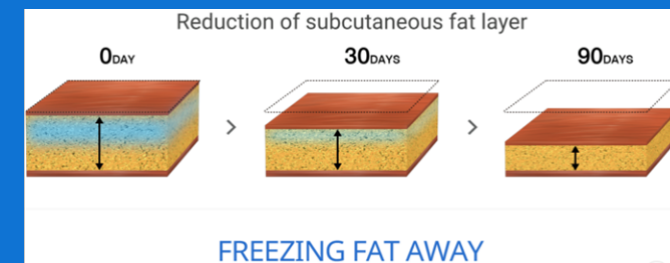

At Bslim Sydney, we have the most technologically advanced cryolipolysis and fat freezing system available today, killing up to 30% of fat cells with each treatment, with results starting from 6 weeks. .

Meizi 360 has dual applicators which allow us to treat two areas at once along with the world's first patented 360° cooling applicators for more effective fat reduction.

CoolSculpting is a revolutionary contouring treatment that freezes stubborn fat, which is then naturally eliminated from your body. No needles, no special diets, no supplements, no surgery. And most importantly, no downtimes. It's safe, medically-cleared, and very effective.

Each treatment takes around 60 minutes. As the cooling begins during the first few minutes, you will feel pressure and intense cold. This soon dissipates as the area becomes numb. Many people read, watch videos, work on their laptop, or even take a nap during their treatment.

Once the treated fat cells are gone, they are gone for good. As long as you maintain your weight with your normal diet and exercise, your long-term results should remain stable.
